

Russelia

gradinar, Tuesday 17 February 2009 - 12:53:45

Ruseliyata (Russelia) is among the most common of garden plants, and is easily recognizable by its brilliant red or white flowers that are shaped like vases spike. Ruseliyata grows in many parts of the world.

Ruseliyata is often used to hide unattractive walls or fences, because there is dense vegetation. Razte to 1.8 meters. Due to its length Ruseliyata is suitable for growing in hanging pots.

Due to their attractive colors, Ruseliyata attract birds and insects (like bees), which feed on nectar from its flowers.

Some types Russelia:

Russelia acuminata
Russelia alata
Russelia alternifolia
Russelia americana
Russelia campechiana Standl.
Russelia capensis
Russelia chiapensis
Russelia coccinea
Russelia colombiana
Russelia contrerasii
Russelia konzattii
Russelia cora
Russelia cuneata
Russelia deamii
Russelia depressa
Russelia elongata
Russelia ephedroides
Russelia equisetiformis Schltdl. & Cham.
Russelia equisetiformis flowers
Russelia equisitorum
Russelia flammea
Russelia flavoviridis
Russelia floribunda
Russelia furfuracea
Russelia glandulifera
Russelia grandidentata
Russelia hintoni
Russelia iltisneeana
Russelia jaliscensis

Russelia laciniata
Russelia lanceifolia
Russelia leptopoda
Russelia lilacina
Russelia longifolia
Russelia longisepala
Russelia maculosa
Russelia manantiana
Russelia multiflora
Russelia obtusata
Russelia oldenlandioides
Russelia ovatifolia
Russelia oxyphylla
Russelia paniculata
Russelia parvifolia
Russelia pennelliana
Russelia polyedra Zucc.
Russelia pringlei
Russelia pubescens
Russelia purpusii
Russelia racemosa
Russelia retrorsa
Russelia rotundifolia
Russelia rugosa
Russelia sarmentosa Jacq.
Russelia serratifolia
Russelia sonorensis
Russelia staleyae
Russelia standleyi
Russelia steyermarkii
Russelia subcoriacea
Russelia syringaeifolia
Russelia tabascensis
Russelia tenuis
Russelia tepicensis
Russelia teres
Russelia ternifolia
Russelia tetraptera
Russelia tomentosa
Russelia trachypleura
Russelia verticillata
Russelia villosa
Russelia viscosa
Russelia worthingtonii

Cultivation:

Irrigation: During the summer watering thoroughly, but before any watering make sure the top layer of soil is dry and then watering. Be careful not to hold the roots of water. In winter watering sparingly as the water temperature must be consistent with the room

temperature - large amplitude do not tolerate the flower.

Location: Ruseliyata loves sunny place, and in summer it put on the terrace of direct sunshine. To provide its necessary light and heat during the winter, place it on a south window and provide a temperature around 15 degrees.

Propagation: be propagated by cuttings in summer or cuttings. During fueling growth in mineral fertilizer. Spring is in transplant medium clay containers with garden soil.
