

## Tulipa

gradinar, Wednesday 16 July 2008 - 12:03:31

Tulip (*Tulipa*) is a genus of flowers, rich in species and wide range of varieties. With its beauty, variety of shapes and colors of tulip colors is among the first places between bulbous flowers. Colors are a wide bell shape, one of the flowering stalk, colored by all sorts except blue.

Different varieties reach a height of 20 to 70 cm and bloom from March to May.

Home of the tulip is Turkey. The name is taken from *tyulband* word, which means turban, the most - largely because of the shape of tulips *chashkata*.<sup>V</sup> Netherlands were taken over from Persia.

Tulips are among the best - highly cultivated garden flowers. They are perennial.

Tulips can be planted with other perennial, shrubs, trees and grass.

Tulipe requires warm and sunny places, but it grows well and *polusyanka*. Most appropriate for him have clay-sandy soils.

Watering only if the spring is dry. The bulbs are removed each year when the leaves begin gleamed yellow - usually in early June. *Prosushavat* in crates of shady and ventilated places, clean and protected until autumn, when re-planted.

Soil for bulbs should be well drained, porous. Must be added to compost, peat moss or other humus-rich ingredients. These materials should be placed at a depth of 30 - 40 cm, so that new root system has a chance to grow. You can add a little fertilizer, which is mixed with dust.

In very wet soil may develop fungus. At the same time, the bulbs can and dry due to suffocation if the soil is too concise and it does not have enough oxygen.

In the spring, at the end of the season, clean colors of the plants before they attacked on the leaves. If you do, the flowers may be decayed and died. Six to eight weeks remove the tulips from the ground, clean them well and let the soil dry and airy place to *prezimuvat*. *Kogato sadist* tulips (most - well in October - November) enriched garlic and pour. The depth should normally be three times the length of the bulb. Tulips should not be pot in a very short distance.
